United States Industrial Fabrics Institute

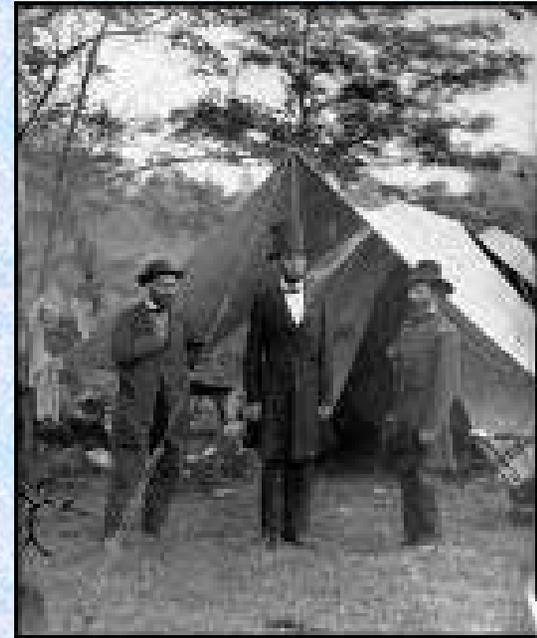

- Industrial Fabrics Association International
- Fabrics Specification Committee

Commercial Off The Shelf

- COTS compared to
- Military Standard
- GSA compared to DLA
- Accredited Testing Program

COTS Compared to Military Standard Shelters

- Field Requirements to COTS Manufacturer
- Field requirements to Material Developers and Combat Developers to the Program Managers to Inventory Control Points to Industrial Base Contractor.

COTS Compared to Military Standard Shelters

- Valid Need (Duplication of products that would result to frustrate supportability by normal military supply channels.)
- Develop Requirements
- Design Validation (Prove the product meets the requirements.)
- Fielding Plan
- Provisioning (Spare Parts, Manuals.)
- Safety Release
- Sustainment, Spare Parts, Distribution

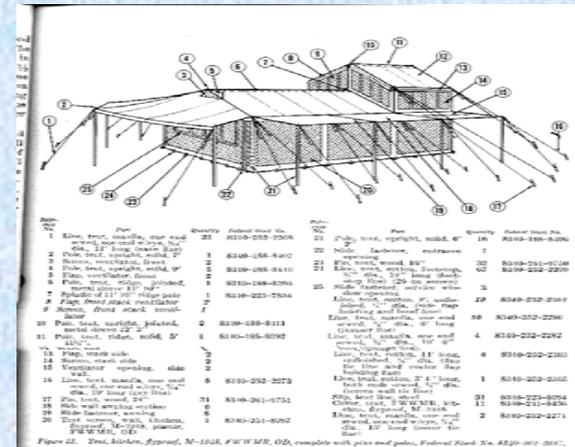

Figure 22. Tent, Shelter, Standard, M-1958, F311M58, Q2, complete with pins and poles, Federal Stock No. 8210-252-2265.

GSA / DLA

- Have not passed the milestones of type classified.
- Parks and Recreational Equipment for tactical military products
- Quality Assurance
- Interoperability
- Accountability and Liability
- Depot and Distribution
- Product and Component Testing and Traceability.

COTS Testing

- Standard Test procedures
- Documentation of reported results
- Commercial Tech Manual Validation
- Component material specification and testing
- Spare Part validation
- Lot release testing
- Marketing
