Joint Committee on Tactical Shelters (JOCOTAS)

Meeting Summary

THE JOINT COMMITTEE ON TACTICAL SHELTERS (JOCOTAS) AND JOINT STANDARDIZATION BOARD FOR SHELTERS AND EXPEDITIONARY BASING (JSB-S&EB) SPRING STRATEGY MEETING. On 19-20 May 2015 Natick Soldier Research Development and Engineering Center (NSRDEC) and PdM Force Sustainment Systems (PdM FSS) co-hosted a shelter and expeditionary basing strategy meeting for members from across DOD. JOCOTAS is chartered to promote standard solutions for Warfighter shelter requirements in the soft wall (tents) and rigid wall shelter areas. The JSB-S&EB recently expanded that role to include solutions that enable reduced use of energy and water and, systemic management of waste. Representatives from all Services and the Defense Logistics Agency participated in the discussions. The focus of the meeting was establishing a path forward to operationalize new working groups. Forty-two the meeting that covered shelter and The Defense Standardization Program Staff, Logistics Innovation Agency, RAND provided a total of sixteen Path Forward, was presented by the setter for the workshop. Synopses for NSRDEC JOCOTAS website. A two and twenty-three multi service, broken into three groups to work standardization mean" and, "Identify when scoping the three new JSB-groups worked standardization adopt another Service's system or New Marine Corps or Army Shelter programs. In session two, each group worked on one of the new JSB-S&EB areas focusing on "What's important to Leadership/Users" and "What should be in or out of Scope". Each group presented results and discussed their findings at the end of the session. The out briefs were charted. A draft report detailing ideas and recommendations will be prepared for the JOCOTAS Voting Members and Officers. Once reconciled, a final report will be distributed to the participants. Workshop – New Mission

Break into three groups

Three Topics for consideration

1. Standardization Discussion

- a. What does standardization mean to you?
- b. How willing is your organization to adopt another Service's system or component ?
- c. Would your Service be willing to rally around either the New Marine Corps or Army Soft or Rigid Wall Shelter program, or both
- d. Consolidate ideas and Out brief the Group

2. New Mission Areas I Energy, II Water and III Waste Management

- a. What's Important to Leadership and what's important to the User
- b. What should be in scope / out of Scope
- c. Consolidate ideas and Out brief the Group

sheltering warfighters worldwide

PAO # U15-317

Joint Committee on Tactical Shelters (JOCOTAS)

3. Insights

- a. Provide 3 recommendations or insights related to building the new mission areas?
- b. Who should we be working / collaborating with on these new missions?
- c. Consolidate ideas and Out brief the Group

4. Close out discussion
